UNIQUE REFERRAL CODE

Every user who successfully creates an account will automatically receive a unique referral code.

The user can share this unique code with other people. When a new person creates an account using the referral code, the new account will be linked to the referring user. This allows the system to automatically track referrals and calculate the user's referral members and applicable referral benefits.

Important: Each referral code must be unique to one account and cannot be duplicated or assigned to another user.
